PROFESSIONAL SUMMARY

Software Developer with a Computer Science background and hands-on experience building backend and full-stack applications in C# (.NET) and Angular through independent, self-directed projects — including REST APIs, SQL Server/MongoDB data layers, and an internal management system currently in development. Brings genuine business-operations experience from several years supporting quotations, expense tracking, and project coordination for a construction and building-materials company, providing a practical, first-hand understanding of real operational problems. Working knowledge of Python, SQL, and AI automation. Seeking a Backend or Full Stack Software Developer role.

TECHNICAL SKILLS

Languages / Frameworks

C#, .NET, ASP.NET Core, Angular, TypeScript, JavaScript, HTML, CSS, Python

Databases

SQL Server (Data Modeling, Stored Procedures), MongoDB, PostgreSQL

Other

REST APIs, Clean Architecture principles, SOLID, JWT Authentication, Git, Xamarin.Forms, Windows Forms, AI-assisted automation

Productivity Tools

Microsoft Office / Microsoft 365 (Word, Excel, PowerPoint)

EXPERIENCE

Software Developer & Operations Support — Soluciones Expande

2023 – Present

Construction & building-materials company — San José, Costa Rica

Develop and maintain the company's production management system (per-warehouse inventory, point of sale, purchasing, invoicing and projects) with ASP.NET Core, Angular and SQL Server.

Managed price quotations, expense tracking, and investment/cost reporting for a construction and building-materials company operating across Costa Rica.

Supported on-site construction projects — houses, buildings, and terraces — working alongside architecture and building teams.

Provided customer service and administrative support for client-facing operations.

Gained direct, practical understanding of construction and business workflows, later applied to designing an internal software tool for the company (see Projects).

PROJECTS

LvBuild (LV Construcciones) — Backend ERP for a Construction & Building-Materials Business

Designed and built a backend ERP in C# / .NET 8 using Clean Architecture, covering three integrated lines: construction budgeting/quoting and project tracking, point-of-sale, and warehouse inventory.

Implemented a quoting-to-project workflow with state machines, automated PDF generation, site logs, payroll, and automatic project cost tracking with no double-counting.

Built JWT authentication with refresh tokens, plus role-based authorization across 5 organizational roles.

Covered core business logic with automated unit tests (xUnit).

EDUCATION

Licentiate Degree in Computer Science — Emphasis in Software Application Development

Castro Carazo University, 2025 — graduated with honors

Bachelor's Degree in Computer Engineering

Castro Carazo University, 2024

English Certification

Discovery Academy, 2024

Continuing Education: Python, SQL & AI Automation

VLA Academy, 2026 (ongoing)

LANGUAGES

English – Advanced | Spanish – Native
